

# High Performance Building Design

## Do it Smart, Do it Right

Green Needham Collaborative is excited to be hosting an early evening event for builders, lenders and real estate brokers as well as Town of Needham officials on building **“green” net-zero energy** homes and buildings. Our presenters will be sharing simple ways to increase the energy efficiency of a building, both for new construction and renovations to reduce/eliminate greenhouse gas emissions—**without significantly changing the way you do your work.** We will also be learning about evaluating properties that have been designed with high efficiency in mind.

Please join us...

**Monday, January 31st**

**Time: 5:30pm—7:30pm**

**Location: Zoom Webinar**

### **RSVP:**

As a thank you for attending, Green Needham will be awarding five \$100 gift cards for Needham restaurants at the end of the session.

Please register by clicking [HERE](#) or by emailing to Donna Vello at [donna.vello@gmail.com](mailto:donna.vello@gmail.com)

We look forward to seeing you!

**Michael Greis, Chair**  
**Green Needham Collaborative**
