Article Information: Every year, the United States produces between 40 - 50 million tons of plastic waste. Much of this waste comes from single-use plastic items. Single-use plastic items are used once, for a short period of time and disposed of quickly; but they leave a legacy of pollution for generations to come.

Most single-use plastic shopping bags are either not recycled or not recyclable. Instead, they will either be buried in a landfill, burned in an incinerator, or scattered throughout the environment. Plastic checkout bags have a significant impact on the marine and terrestrial environment, including but not limited to: 1) harming animals through ingestion and entanglement; 2) polluting and degrading parks and ecosystems ; 3) clogging storm drainage infrastructure; 4) creating a burden for solid waste disposal and recycling facilities; 5) requiring the use of non-renewable fossil-fuel in their composition 5) breaking down into microplastics which pollute drinking water and have negative effects on human health.

Many single-use items are unnecessary because we have reusable alternatives. The best way to solve the plastic pollution crisis is to reduce the amount of plastic we produce. One way we can do that is by phasing out needless single-use plastic items like bags. By banning these items, we can lower demand for plastic, limit plastic pollution, and help create a culture of reuse.

The purpose of this Bylaw is to protect the Town's unique natural beauty and reduce the Town's plastic waste. The Bylaw will end the use of single-use plastic checkout bags that are being distributed, used, discarded and littered, and promote the use of reusable checkout bags in the Town of Needham.
